

Commercial Burn Permit (CBP) Application

Page 1 of 2

Updated AUGUST 2023

NOTICE TO APPLICANT

Upon submission of the application and fee, the use of an Air Curtain Destructor (ACD) is **mandatory**. Burning of debris generated by machine clearing of an area for the purpose of land clearing is considered a land type change subject to the EPD land clearing ACD rules and operation guidelines.

Commercial Burn Permit (CBP) Application

Page 2 of 2

Updated AUGUST 2023

Applicant Mailing Address

I, the undersigned, certify that I have read and examined this application and know the same to be true and correct. I understand that the permit issued is only for land clearing as stated, and that all requirements are met. The permit is granted on the express condition that the said clearing shall, in all respects, conform to the ordinances and laws of the City of Pooler, Georgia, including the zoning ordinance, regulating the construction and use of buildings, and may be revoked at any time upon violation of any provisions of said ordinances. I understand that the ability to burn materials for land-clearing may be suspended and/or revoked at any time by the Fire Chief or any other agent within in the City, if all guidelines are not being followed or in their opinion, the fire is creating a nuisance to surrounding properties. If any information is found to be false or misrepresented, the permit will be deemed invalid. I understand that the fire and any resulting smoke are my sole responsibility and agree to hold the City of Pooler harmless from any resulting damages. I agree to indemnify and hold harmless the City of Pooler from all damages, demands, or expenses of every character which may in any manner be caused by this work.

Commercial Burn Permit (CBP) Checklist/Process

Page 1 of 1

Updated AUGUST 2023

1. Land Disturbance/Timbering Request

- Approved Site Plan from Planning & Zoning. If not, why?
- Approved Landscape Plan from Planning & Zoning. If not, why? _____
- □ Tree Survey conducted and submitted? If not, why? ____
- Approved Site Plan from City Council. If not, why?
- Approved Landscape Plan from City Council. If not, why?

2. Commercial Burn Permit (CBP) Application

- □ Obtain CBP application from Fire Headquarters.
- Complete CBP application.
- □ Submit CBP application to Stacy Weston for processing.
- Upon approval, application showing authorization to proceed will be emailed to the applicant.

3. Planning & Development (Building) Department

- Applicant shall bring approved CBP application to Pooler City Hall and pay permit fee.
- Applicant shall submit original CBP application to the Pooler Planning & Development Department to be filed with the approved Land Disturbing Activity (LDA) Permit.
- Building & Zoning Specialist will email Stacy Weston upon completion.

4. Burning Process

- Upon ignition or the intent to ignite, Pooler Fire-Rescue Services must be notified by calling (912) 748-7012 or emailing sweston@pooler-ga.gov.
- Upon completion of the burning process, Pooler Fire-Rescue Services must be notified by calling (912) 748-7012 or emailing sweston@pooler-ga.gov.

What is an Air Curtain **Destructor (ACD)**?

A forced air pit incinerator, for the purpose of disposing vegetative waste and debris.

Operating Guide

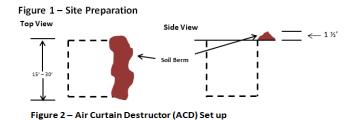

No smoke emissions exceeding forty percent opacity may be produced during operation except for a reasonable period during ignition and charging of the pit.

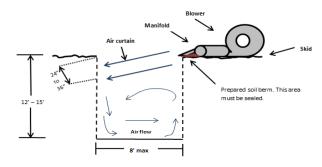

When the pit is cleared of ash, airborne particulate is to be minimized by wetting or mixing the ashes with dirt.

Prevailing winds during operation must be away from the major portion of residential population.

During an air pollution episode, such as an air pollution alert/warning/emergency declared by proper authorities, the ACD is not to be operated. An air pollution episode occurs when the air contaminant concentration in an area is great enough to cause danger to public health.

Burning may be less objectionable for others if conducted during the day; not on holidays or Sundays; when there is no rain or heavy fog predicted; or, usually, after at least one day following the passage of a cold front.

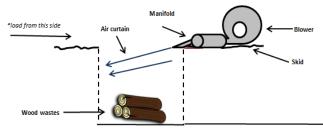

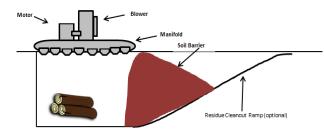

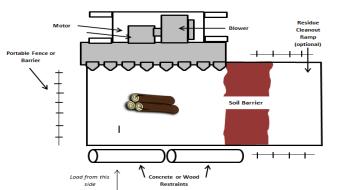

Figure 4 – Profile of Pit and ACD

Air Curtain Destructor:

A Quick Reference Guide to achieve compliance with Georgia's Air Curtain Destructor (ACD) Regulations

Do not operate an ACD without the proper <u>Burn</u> <u>Permit</u>

Always obtain a Burn Permit

At all times, adhere to all local ordinances and regulations regarding use of an air curtain destructor.

No more than one ACD can be operated within a ten acre area at one time.

A damaged ACD with an air duct or manifold that cannot pass an even flow of air across the top of the pit is not authorized.

The ACD must be operated to prevent air, land or water pollution, safety/health hazards, or nuisances.

The amount of dirt/soil on or in the material being burned must be minimized.

Operating Procedures

I) Site Location and Preparation

-Select a site which will likely have a low water table, can be easily excavated and is no less than 300 feet from occupied structures.

2) Pit Preparation

-Excavate the pit using either a front-end loader or backhoe. The pit dimensions are 8 feet wide x 12-15 feet deep x 15-30 feet long (pit length depends on length of ACD manifold). In no case should the 8 feet width be exceeded.

-The pit must be excavated with at least three vertical sides in soil capable of maintaining vertical walls of 15 feet depth with out failure. Additional wall support may be necessary. Caution must be exercised to insure that walls are not undercut during excavations.

-If a front-end loader is used for the excavation, the end used for travel must be filled in with dirt beginning at the end of the manifold and filling up the ramp. (See Figure 4)

3) ACD Manifold Set up

-Using a small berm of soil (1 to 1/2 feet high) place the manifold (plenum and nozzles) such that the manifold is properly supported and the space between the manifold and ground is sealed. Rotate the manifold until the air curtain will be directed at an imaginary horizontal line 24 to 36 inches below the top of the opposite wall. Slide the skid containing the blower and motor into place and connect to manifold. (See Figure 2)

4) Ignition Procedures

5) Get a Burn Permit from Pooler Fire-Rescue

6) Load the pit half full with the homogeneous mixture of logs, trees and large brush. Douse the wood with 1/2 gallon of fuel oil putting the majority of the fuel oil on the wood at the front cen-ter side of the pit. Ignite the wood at the same point. Allow sufficient time for the fire to take hold before introducing any air from the ACD. As the fire grows in intensity, gradually bring the blower up to the optimum speed (generally between 1,100 and 1,400 RPM, depending on the size, type and make of the blower)

Do not use tires or highly volatile solvents such as mineral spirits, gasoline, etc. for ignition.

Operating Procedures (continued)

5) Loading Procedure

-Once the fire reaches full intensity, successive intermittent charging may begin.

-The intervals between charges may be determined by observing the burning rate. Generally, if the fire is kept at its maximum intensity, it will keep one man, operating a front-end loader or clamshell bucket constantly busy. The charges should be alternated between light and heavy material. The material should be charged toward the rear of the pit under the ACD manifold.

-The pit should not be overloaded; that is the material should not be piled up so high that it will protrude above the air curtain. Also, no materials should extend outside the boundaries of the pit and air curtain where sufficient air is not available from the nozzles.

6) Maintenance and Safety Requirements

-Ash removal is required in order to maintain efficient and proper combustion. Ashes should not be allowed to build up in the pit to higher than I/3 the pit depth or to the point where they begin to impede combustion and are blown out of the pit, whichever occurs first.

-If spalling, "cave off" occurs during operation, a new pit must be constructed and the existing pit filled with soil.

-Any accumulation of water in the pit must be removed prior to operation.

-For reasons of public safety, a fence or barrier surrounding the combustion pit is recommended.

-A "stop guide" or restraint must be provided at the loading side of the pit in order to keep the loader from getting too close to the pit during the charging operation.

Only wood wastes consisting of trees, logs, large brush and stumps relatively free of soil may be burned. Leaves, sawdust, other densely packed wood wastes, paper (any type), chemically treated, coated or impregnated wood CANNOT be burned.

STATE OF GEORGIA)

COUNTY OF CHATHAM)

AN ORDINANCE TO AMEND CHAPTER 46, ARTICLE I, OF THE CODE OF ORDINANCES FOR THE CITY OF POOLER; TO AMEND SECTION 46-6; TO REPEAL CONFLICTING ORDINANCES; TO SET AN EFFECTIVE DATE AND FOR OTHER PURPOSES.

THE MAYOR AND COUNCILMEMBERS OF THE CITY OF POOLER, GEORGIA, do hereby ordain as follows:

I.

That Sec. 46-6 of the Code of Ordinances for the City of Pooler be deleted in its entirety the following be placed in lieu thereof:

Sec. 46-6. Outdoor burning.

All burning operations in the city shall comply with the "Rules for Air Quality Control" chapter 391-3-1 as written and amended by the Department of Natural Resources, Environmental Protection Division, Air Protection Branch unless specifically modified herein.

No person shall cause, suffer, allow or permit open burning in any area of the city without a permit issued by the Pooler Fire-Rescue Department.

The following activities are allowed after a permit is issued:

(1) Residential Property Maintenance

Burning of leaf piles and other "natural vegetation" such as trees, shrubbery and pine straw on the premises on which they fall by the person in control of the premises are permitted, subject to the described restrictions:

a. No burn pile shall be larger than six feet (6') in diameter by two feet (2') high. There shall be 10 feet between burn piles. The location for open burning shall not be less than 50 feet from any structure (house, outbuilding, fence, public utility, etc.) on larger piles (approximately 3 to 5 feet in diameter), and 25 feet where the pile size is 3 feet or less in diameter and 2 feet or less in height. All fires must be constantly attended by a competent person 16 years of age or older with the ability to extinguish the fire. There shall be no more than two (2) burn piles at any time. No burning of this type will be authorized when the humidity is less than 25 percent or the winds are greater than 10 mph, as provided on the Georgia Forestry Commission daily "wind speed" and "humidity" database Failure to comply with these rules which results is an uncontrolled fire or a valid complaint that requires the response of the fire department, will result in the fire being immediately extinguished.

Burn piles can be ignited (1) hour after sunrise and must be extinguished (1) hour before sunset.

Fires can be or will be extinguished by fire department personnel if there is a complaint of the burning process.

(2) Land clearing

Burning of vegetative material for the purpose of land clearing and/or the construction of rights-of-way is allowed only after obtaining a permit, subject to the described restrictions. Permits shall only be issued when an air curtain destructor (ACD) is used and the following conditions are met:

- (a) All burning must be contained within pits that are eight feet (8') wide, 12-15 feet deep and 15-30 feet long (dependent upon the length of the ACD manifold) and the ACD must be operated in accordance with the operating procedures set forth by Department of Natural Resources.
- (b) Pits shall be at least 300 feet from any occupied or habitable structure (the distance may be increased/decreased at the discretion of the fire chief or his designee);
- (c) Where a site cannot be excavated to the recommended depth due to high water table and/or subsurface rock, the pit may be constructed above ground level, subject to the same standards and procedures in accordance with Air Curtain Destructor Operating Guide and Procedures set forth by the Mountain District-Atlanta Office Environmental Protection Division.
- (d) Only wood waste consisting of trees, logs, large brush, stumps and untreated lumber which are relatively free of soil are burned;
- (e) Leaves, sawdust or other densely packed wood wastes, paper, chemically treated, coated or impregnated wood or non-wood construction material shall not be burned;
- (f) No more than one (1) ACD is allowed to be operated within a 10 acre site at one time or there must be at least 1,000 feet any two ACDs;
- (g) Operation of the ACD must be conducted under the supervision of a trained operator at all times;
- (h) ACD shall be able to pass an even, non-turbulent flow of air across the top of the pit and shall be operated in a manner to prevent air, land or water pollution, safety/health hazards or nuisances;
- (i) Only diesel fuel or kerosene may be used as a liquid accelerant to ignite fires;
- (j) Tires or other rubber products, plastics, heavy oils or asphaltic base or impregnated material shall not be used to start or maintain ACD operations;
- (k) No smoke emission exceeding 40 percent opacity may be produced during operation except for a reasonable period during ignition and charging of the pit;
- (1) The cleaning out of the ACD is performed in a manner to prevent fugitive dust, by wetting or mixing the ashes with dirt.
- (m) Fires can be or will be extinguished by fire department personnel if there is a complaint of the burning process.

In addition to any other conditions, issuance of the permit shall be subject to the following procedures:

- (a) Permits for fires shall be obtained from the Pooler Fire-Rescue Department for each operational period;
- (b) Prior to commencement, the applicant shall submit to the fire chief or his designee, a plat or site plan showing the proposed location of the pit and any information relating to the proximity of any occupied or unoccupied structure;
- (c) Burning shall not commence prior to an inspection of the site and pit by the fire chief or his designee;
- (d) Payment of the fee, as provided in the schedule of fees, shall be submitted along with the application, prior to the time of inspection;
- (e) Upon approval, the permit shall be valid for 30 days from the issue date; and
- (f) Permits may be extended for a period of 15-day increments without additional fees, with a maximum of two (2) extension periods.
- (3) Uncontrolled Burns prohibited: penalties.
 - (a) Definitions. The following words, terms and phrases, when used in this section, shall have the meanings ascribed to them in this subsection, except where the context clearly indicates a different meaning:

Uncontrolled burn means any fire started outside the residence or business in the city without a proper permit and without at least one individual maintaining a constant vigil within reasonable proximity to the fire for the purpose of supervision.

(b) Prohibited. Anyone who participates in causing an uncontrollable burn of flammable material in the city shall be subject to penalties as provided in Chapter 1, section 1-12, General Penalty. In addition, the individual, landowner and/or company is responsible for their smoke and embers and is liable for any damages and/or costs to extinguish fires resulting from the burn.
