

Stormwater Education for Kids

Only Rain Down the Storm Drain

Not all water that falls on your property soaks into the ground. As water flows off your property, it can wash pollutants such as soil, lawn chemicals and pet waste into where we fish, what we drink and where we swim.

It's up to all of us to protect our local rivers, lakes and ocean from polluted runoff.

POLLUTANTS FOUND IN STORMWATER RUNOFF

1. Pet waste
2. Litter
3. Fertilizer
4. Motor Oils
5. Chemicals

Be the solution to stormwater pollution!
